

DAN DRYER TAPS

Deck mounted high-speed hand dryer, soap dispenser and water faucet

- Hygienic and space-saving
- Touch-free operation
- No waste water on the floor

DAN DRYER TAPS is a product line consisting of sensor-operated hand dryers, soap dispensers and water faucets. The products start and stop without user contact; they are efficient, visually appealing and can be installed separately or as a complete family.

The product design stands out thanks to its practical, hygienic and space-saving features. Touch-free operation ensures a maximum level of hygiene and the convenience of washing and drying hands at the same place means no water drips on the floor.

A solution that works for a modern look and frees up more wall space in commercial washrooms; ideal for architects and construction projects to integrate at the very beginning of the design thinking phase.
